Nashville, TN | 615-618-5170 | tanishneema15@gmail.com | linkedin.com/in/tanish-neema-446a771a1 | github.com/Mr615-TN

PROFESSIONAL SUMMARY

Software Engineering graduate with hands-on experience in full-stack backend development, high-performance systems programming, cloud infrastructure, and data processing. Demonstrated capability in engineering resilient backend architectures (AWS Neptune, JanusGraph), implementing containerized microservices, and writing concurrent automation tools in Rust, Python, and JavaScript for high-throughput operational environments.

TECHNICAL SKILLS

Languages: Python, Rust, C++, C, JavaScript, SQL, HTML/CSS, Assembly
Frameworks & Libraries: React, Node.js, Express, Flask, PyTorch, ROS, Rayon, BeautifulSoup, NumPy
Cloud & DevOps: AWS (EC2, Neptune), Docker, Kubernetes, CI/CD, Git, Linux (Fedora/Debian), PlatformIO
Databases & Storage: AWS Neptune, JanusGraph, Redis, MariaDB, MySQL, SQLite, Cassandra
Security & Developer Tools: Network Security, Cryptography, AST Parsing, Valgrind, Jira, Postman

CERTIFICATIONS

IBM DevOps and Software Engineering Professional Certificate IBM via Coursera	<i>In Progress</i>
CompTIA Security+ CompTIA	<i>Expected 2026</i>
Google Cybersecurity Professional Certificate Google via Coursera	<i>Mar 2026</i>

EXPERIENCE

MetaMorph Inc. <i>Software Engineering Intern</i> • Designed and implemented high-performance AWS Neptune and JanusGraph database architectures for complex data relationship mapping. • Managed containerized deployment and integration testing of graph data management tools using Docker and automated scripts. • Optimized graph traversal queries, improving data retrieval efficiency across enterprise datasets.	Nashville, TN <i>Jun 2024 – Jan 2026</i>
Lipscomb University <i>Research Assistant – Baxter Robot AI Project</i> • Engineered an interactive campus tour guide platform combining custom ROS nodes with real-time speech processing pipeline. • Deployed Mistral 7B as a local LLM conversation engine to handle natural language processing with low-latency execution. • Integrated Coqui TTS and Whisper models for robust speech-to-text conversion and high-fidelity speech synthesis.	Nashville, TN <i>Jul 2025 – Oct 2025</i>
Virginia Commonwealth University / ELIPSS <i>Software Engineering Intern</i> • Developed backend REST API endpoints using Python to power an active learning web application deployed on AWS EC2. • Built dynamic, state-managed UI components using React to streamline instructor and student interactive workflows. • Automated deployment workflows and established detailed technical documentation for infrastructure migrations.	Remote <i>May 2023 – Jun 2023</i>

PROJECTS

Multi-Language Parallel Syntax Checker <i>Rust, Rayon, AST Parsing, CLI</i> • Engineered a high-performance CLI tool in Rust to perform parallel static code analysis across multi-language codebases. • Utilized Rayon for multi-threaded file parsing to validate syntax trees with low latency and minimal memory overhead.	2025
ArticleToTxt Extraction Pipeline <i>Python, Web Scraping, NLP, File I/O</i> • Built an automated data ingestion pipeline in Python to extract unstructured web content and normalize it into structured text formats. • Implemented robust handling for dynamic web elements, encoding edge cases, and automated file system storage.	2025
Open-Source URL Shortener Microservice <i>Python, Redis, SQLite, REST API, Docker</i> • Architected an open-source URL shortening system in Python using hashed redirection keys, SQLite persistence, and Redis caching. • Implemented rate-limiting and custom alias validation rules to prevent abuse and reduce backend routing latency. • Containerized application services using Docker Compose for streamlined local testing and production deployments.	2026
POGIL Project / SKILLBUILDER Capstone <i>Python, React, AWS EC2, Git</i> • Engineered Python backend microservices handling secure user authentication, database management, and role-based access control. • Maintained production cloud instances on AWS EC2, implementing automated security updates and backup procedures.	Aug 2022 – May 2025
QR Code Inventory Manager <i>JavaScript, Node.js, Express, SQLite</i> • Created a mobile-responsive full-stack platform featuring real-time QR generation, database syncing, and asset tracking.	Jul 2025 – Present

EDUCATION

Lipscomb University <i>Bachelor of Science in Software Engineering, Minor in Mathematics</i>	Nashville, TN <i>Aug 2022 – May 2025</i>
